Wilkie, D. 99, 284
Young, J. B. 223, 269

Titles

Aerodynamic and geometric optimization for the design of centrifugal compressors 49
Calculation of the reflected wave from a pipe with a nozzle end by the Lax–Wendroff method 205
Colour-coding schlieren technique for the optical study of heat and fluid flow 3
Computer simulation of the trajectories of large water jets 137
Correlation of engineering data reconsidered 99
Determination of principal characteristics of turbulent swirling flow along annuli, Part 2: Measurement of turbulence components 31
Effect of blade profile on the performance of the Wells self-rectifying air turbine 17
Effects of boundary reflection on radiative heat transfer in participating media 235
Effects of free steam turbulence on the distribution of heat transfer around turbine blade sections 181
Effect of frequency of air flow on the performance of the Wells turbine 127
Research Note
Experimental results for nucleating steam flow in a two-dimensional supersonic duct and comparison with theory 223
Flow and heat transfer in a rotating cavity with a radial inflow of fluid 228
Freezing around a finite heat sink immersed in an infinite phase change medium 104
Friction factors of finite and infinite square arrays of roughened pins 284
Fully computerized evaluation of interferograms from fluid flow investigations 133
Research Note
Fundamental sloshing frequencies of stratified two-fluid systems in closed prismatic tanks 142
Heat transfer from a vertical tube bundle under natural circulation conditions 256
Heat transfer in tube assemblies under conditions of laminar axial, transverse and inclined flow 193
Heat transfer promotion with a cylinder array located near the wall 249
Local Nusselt number and temperature field in turbulent flow through a heated, square-sectioned U-bend 171
Mass and heat transfer by natural convection in a vertical cavity 149
Natural convection in an inclined enclosure containing internal energy sources and cooled from below 113
Numerical simulation of transient response of heat transfer from a hot-wire anemometer transducer 57
Performance of a small air-lift pump, 217
Performance of conical entrance orifice plates at low Reynolds numbers 122
Pool boiling performance of finned surfaces in R-113 23
'Pop' safety valves: a compressible flow analysis 279
Prediction of turbulent source flow between stationary and rotating discs 69
Pressure losses in transitions between square and rectangular ducts of the same cross-sectional area 212
Procedure for the design of nozzles used for the production of turbulent liquid jets, a 298
Secondary loss generation by gas turbine support struts 79
Study of thermal non-equilibrium effects in low-pressure wet-steam turbines using a blade-to-blade time-marching technique, a 259
Technique for obtaining approximate solutions for a class of integral equations arising in radiative heat transfer, a 42
Turbulence enhancement of stagnation point heat transfer on a body of revolution 91
Turbulent heat transfer in a flat plate boundary layer disturbed by a cylinder 241
Two phase heat transfer correlation for multi-component mixtures in the saturated flow-boiling regime 265
Viscous dissipation effects on thermophoretically augmented aerosol particle transport across laminar boundary layers 293
Vortex amplifier internal geometry and its effects on performance 160

Letter to the editor

The static and dynamic response of a hot-wire anemometer 226

Book reviews

Advances in drying, Volume 3 125
Drying '84 2
Engineering flow and heat exchange 159
Flow visualization III 292
Fluidized bed combustion and applied technology 56
Forum on unsteady flow 222
Heat conduction 192
Heat flow through extended surface heat exchangers 22
Heat transfer 15
Heat transfer in enclosures 216
Heat transfer in heat rejection systems 170
NBS/NRC Steam tables 88
Numerical heat transfer 68
Perturbation methods in heat transfer 121
Review of mass flow measurements – 1984 211
Thermal Sciences 16 Vols 1 and 2 255
